

Northern Indiana Public Service Company (NIPSCO) is claiming that the EPA assessment report for their R.M. Schahfer Power Plant contains “Confidential Business Information”. While EPA is working to resolve these claims with the company, the materials related to this assessment will not be posted. However, each unit and its structural integrity condition rating and hazard potential rating will be listed in the summary table available in the FAQ section (<http://www.epa.gov/epawaste/nonhaz/industrial/special/fossil/coalash-faqs.htm#18>). The Action Plan that NIPSCO developed in response to the recommendations in EPA’s final assessment report is also posted.
